WORDS TO INSPIRE INNOVATION

CMTS KEYNOTE EXCLUSIVE

Kevin O'Leary

Kevin O'Leary has developed a cult following with his pull-no-punches look at the good, the bad and the ugly of business and investments. His entrepreneurial vision, investment smarts and drive to succeed are regular features on the CBC's Dragon's Den, BNN's SqueezePlay and O'Leary Live, CBC Newsworld's Lang & O'Leary Exchange, and ABC's Shark Tank.

In 1986, O'Leary co-founded SoftKey Software Products, and by the late 1990s, the company had acquired numerous competitors including Compton's New Media, The Learning Company, Mindscape and Broderbund. In 1999, the Mattel Toy Company purchased SoftKey for \$3.7 billion, one of the largest deals in the consumer software industry.

With his assertive, opinionated nature, razor-sharp business advice and compelling personal anecdotes, Kevin O'Leary continues to impress and inspire entrepreneurs wherever he speaks.

CMTS AUTOMOTIVE ROUNDTABLE

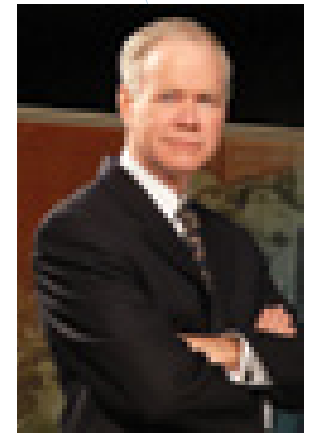

Moderated by John McElroy

For the first time ever, CMTS brings you a panel of Canadian automotive leaders together under one roof to discuss the future of one of Canada's most important manufacturing sectors. John McElroy will moderate an unfettered interactive discussion focused on future trends, opportunities for growth and practical knowledge you can use to grow your operations. Only at CMTS.

Born into an automotive family, John McElroy took his first plant tour when he was only six years old. Reading every book about cars he could obtain led to an understanding of automotive engineering principles. He succeeded in amateur road racing, gained valuable insight as an hourly UAW employee while in college, and eventually became an automotive journalist.

He spent five years as Detroit editor for Road & Track magazine, and has been a regular guest on ABC World News Tonight, CBS News and NBC Nightly News.

Today, in addition to hosting the Emmy Award-winning television program Autoline Detroit, John McElroy hosts Autoline Daily, the first webcast of industry news and analysis, and broadcasts five daily radio segments on the CBS affiliate in Detroit. His unique insight is highly valued by manufacturers and suppliers both inside and outside the automotive industry.
